5. Outlook
We will consistently continue to pursue our strategy of acquiring additional market shares in all business units. At the same time we increasingly use the positions we gained to improve our profitability.

Main focus for the B2B financial market place is an ongoing increase of the penetration of market segments. In addition, the integrational depth of consumers shall be increased by an expansion of our product and service portfolio.

In business unit "Private Clients" we seek restructuring of the insurance business, a strong development of the loan brokerage business and methodic improvement of our margin structure.

Our business unit "Institutional Clients" will continue its sustainable growth by using leadership in innovation in the industry sector and expansion of our product portfolio.

For 2014, we expect double-digit sales growth and income above the level of the record years 2010/2011.
