Mortgage finance – market has strong potential

Factors influencing the private and institutional residential real-estate finance markets

### Negative factors

- Lack of available properties
- High ancillary purchasing costs
- Legislators keep the market busy with a steady stream of new regulatory ideas
- Commercial and residential projects competing for construction resources

### Positive factors

- Strong pent-up demand in and from the rental market
- Buying often cheaper than renting
- Slight growth in construction activity
- Market share of neutral loan brokerage advisors is growing
- Proportion of home ownership (less than 50%*) remains low compared with other EU countries

Credit Platform

Segment results
EUROPACE again outperforms the market by a long way

Credit Platform: volume of transactions and number of partners

- Transaction volume per sales day*** rises to record high of €228 million (Q1–Q3) / €229 million (Q3)
- Volume of transactions on EUROPACE in the most important product group, mortgage finance, increases by 15% year on year; market as a whole only expands by just under 4%
- Growth of building finance product group linked to growth of mortgage finance due to linked sales activities
- Strong growth in the personal loans product group supported by KreditSmart – Hypoport's cutting-edge front-end technology – and white-label sales

**Incl. FINMAS and GENOPACE partners.

*** The number of sales days equals the number of bank working days less half of the number of ‘bridging days’ (days falling between public holidays and weekends).
Strong growth at regional banks

GENOPACE and FINMAS sales transaction volume and number of contractual partners

- The use of EUROPACE by savings banks and cooperative banks for own-account distribution continues to increase at a faster rate than is the case for the overall marketplace.
- Savings banks, in particular, are intensifying their use of FINMAS for own-account distribution and forging ahead with rollout projects.
- Further rise in the number of contractual partners is creating potential for other regional banks that use FINMAS or GENOPACE for own-account distribution.
- Only one of the top 25 savings banks is not yet connected to FINMAS.
- FINMAS: 42 of the top 50 savings banks are already contractual partners.
- GENOPACE: 43 of the top 50 credit cooperatives and mutually owned banks are already contractual partners.

Substantial growth secures market leadership

Credit Platform: revenue, gross profit and earnings

- Revenue in the Credit Platform segment already at around €80 million for the first nine months of 2018.
- Growth driven by all sub-segments (EUROPACE, FINMAS, GENOPACE, Qualitypool, Starpool and white-label sales of personal loans).
- The contributions to revenue growth from Qualitypool and Starpool, which both have weak gross profits, were slightly below average. This explains the above-average increase in gross profit.
- Links between the Credit Platform segment and the new Real Estate Platform segment – to which the new companies FIO and Value AG belong – are creating further potential for revenue in the two segments.

Private Clients

Segment results
Dr. Klein makes significant gains in market share

Private Clients: volume of loans brokered and number of advisors

- Dr. Klein again expands its market share in a mortgage finance market that is only experiencing slight overall growth (+4%).
- The number of loan brokerage advisors as at 30 September 2018 advances by 13% compared with the same date in 2017.
- Expanding customer base thanks to continued growth of interest in neutral loan brokerage advice among consumers.
- The combination of a rising number of advisors and increasing demand from the expanding customer base provides strong foundations for capturing further market share.

Dr. Klein achieves record revenue and earnings

Private Clients: revenue, gross profit and earnings

• The increase in the volume of new loans brokered in the mortgage finance product group resulted in a further year-on-year rise in revenue in the first three quarters of 2018.

• The lower rate of growth in gross profit is attributable to a change in the product mix and the exceptional performance of the franchise stores compared with the Company’s seven flagship stores.

Real Estate Platform (formerly Institutional Clients)

Segment results
Boost to revenue from new subsidiaries

Real Estate Platform: performance of product groups

• Since summer 2018, all of the Group's property-related activities (except loan brokerage for private clients) have been grouped together in the new Real Estate Platform segment.

• The segment's aim is to digitalise the sale, valuation and management of properties; its target groups are the housing and property industries, estate agents and mortgage lenders.

• FIO (software as a service, SaaS) and Value AG (property valuation) have been included in the consolidated financial statements since May. They were successfully presented as new members of the Hypoport network at the FINMAS and EUROPACE conferences in September.
No support from the market
Real Estate Platform: advice and loan brokerage product group

- The lack of stimulus from interest rates caused the volume of transactions in the advice and loan brokerage product group to fall by 15% to €1.3 billion in the first three quarters of 2018.
- The resulting decrease in revenue was limited to around €0.15 million thanks to the conclusion of lucrative one-off deals.
- There was a disproportionally large reduction in EBIT for the advice and loan brokerage product group as a result of building up additional sales capacity in order to utilise synergies between FIO and Dr. KLEIN corporate clients over the long term.
Added value of recent acquisitions can already be seen

Real Estate Platform: revenue, gross profit and earnings

- The segment’s revenue growth was driven by the new subsidiaries FIO and Value AG.
- Increasing proportion of recurring services (SaaS, property valuation) is leading to steady contributions to revenue that are not affected by interest rates.
- The full beneficial impact of FIO and Value AG on revenue is not yet apparent, as they were only consolidated in May and their revenue thus only included for five of the nine months.
- Relatively weak growth of EBIT because sales resources are being built up at Dr. KLEIN corporate clients and in the property valuation product group.

* Prior-year figures adjusted to reflect new segment reporting.

Segment results

Insurance industry

Insurance Platform

Credit Platform

Insurance Platform

Private Clients

Real Estate Platform

ASC

QUALITY-POOL

SMART INSURTECH
Insurance technologies grouped together in this segment
Insurance Platform: revenue, gross profit and earnings

- The technical and cultural integration of the acquired companies is progressing well and unlocking the anticipated synergies.
- The focus is on gaining market share by offering integrated end-to-end solutions and attractive pricing structures.
- The connection of B2C insurtechs / insurapp providers that use the insurance platform as a back-end solution is going far better than expected.
- The segment generated a small profit in the third quarter thanks to the exceptionally strong contribution to earnings from ASC.

Many reasons for investing in Hypoport

Investment highlights

- Network of technology companies for the financial, property and insurance industries
- The growth in the volume of transactions on the different platforms comfortably surpassed the growth of the related individual markets.
- Strong organic growth of previous years is continuing and has been combined with growth by acquisition since 2016.
- Great opportunities in the German housing market hold additional potential for growth.
- Regulation and pressure on margins are accelerating the digitalisation of financial services and boosting the revenue potential of Hypoport Group.
- Solid balance sheet structure and reliable cash flow create financial scope for growth.
- For 2018, Hypoport expects the Group's growth to be in double figures, with revenue of €240 million to €260 million and EBIT of €29 million to €34 million.
